QUESTIONS.

To be used in examination for weigher, Assay Department, San Francisco Mint.

1 What is weight of the weight used in assaying gold bullion and marked 1,000?

2 What is the basis of weights used in humid assay?

3 In a base metal assay- assay to ~~be~~ determine the amount of base metal in a deposit or gold ingot chips- approximately 100 parts of copper being present, how much lead would you use in cupellation?

4 How much lead can you safely work off in a cupel?

5 How much silver would you add to a boiling assay of deposit containing 800 gold- 2oo base metal- using 32 degrees nitric acid.?

6 How much silver would you add to a boiling assay of deposit containing 300 gold, 700 silver, using 32 degrees nitric acid?

7 How do you detect the presence of platinum in gold deposits and what is your method of assaying gold deposits showing the presence of platinum?

8 If less than two parts of silver to one of gold exists, in the cornet, what will there be on boiling in nitric acid?

9 In making assay for gold of granulations containing approximately 930 silver and .050 gold how would you proceed?

10 Why do you add a small amount of pure copper (say.010 milligrammess) to a boiling assay of fine gold?

ANSWERS.

1. Half gram- 7.716 grains.

2. 1000 weight==1 gram or 15,432 grains.

3. Four 40grain leads or 160 grains of lead.

4. Not more than the weight of cupel used.

5. 800 x = 1600, add 50 for loss by cupellation, and result is 1600 + 50 = 1650.

6. Would not add any, but on the contrary slightly dilute the 32° nitric acid.

7. If platinum is present nitric acid used is separating (parting) the gold and silver will be colored a permanent straw color on first boiling.
   In assaying gold containing platinum weigh up ¼ regular gold weight- 250 demigrammes- add to this 2000 demigrammes parting silver, cupel, and dissolve in 22 degrees nitric acid. Platinum is soluble in nitric acid when largely alloyed with silver .

8. Gold will protect the silver from action of acid. Silver will not be dissolved- cornet on heating will be silvery or pale brassy in appearance, and will weigh too much and undissolved silver would be weighed as gold. Make a re-assay and add proper amount of silver.

9. Weigh up 1000 (gold weights) of the alloy, add 400 millegrammes of test gold, roll in a 20 grain lead, adding a little copper if none was apparently present in the alloy cupel, flatten, and roll into cornet and boil in 32° acid thus -
   400 x 50 = 450 gold
   930 silver in alloy
   After cupellation the result would be 450 gold and about 910 or 920 silver- practically two parts silver to one of gold. After twice boiling assay in 32° nitric acid dry, anneal and weigh- then deduct amount of gold added and surcharge thus-
   If cornet weighed 450.3
   and proof assay weighed 450.3 the proof having been made from 450 pure gold and 900+ parting silver then deduct surcharge which is 000.3
   000.3 000.3
   Deduct 400 demi milligrammes 450.
   Gold added 400.
   0.50
   Amount of gold in granulations

10. The assay and resulting cornets will be brittle after cupellation, if no copper is added, as there is practically no copper in gold usually assaying .995 to .999 the .005 to .001 being silver or lead.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington January 31,1903.

The Honorable

The Secretary of the Treasury.

Sir:

The act making appropriations for the Legislative, Executive and Judicial expenses of the government for the fiscal year ending June 30th,1903, approved April 28th, 1902, contains under the head of the office of the Director of the Mint, the following provision:

> "For the collection of statistics relative to the annual
> "production and consumption of the precious metals in the United
> "States, five thousand dollars."

In order to carry out the purpose of this provision it will be necessary to have extra help in this office for a period of several months and I have the honor to respectfully request that you will procure from the Comptroller of the Treasury an opinion as to whether authority exists in the above paragraph to employ temporary force or whether such employment will be in violation of Section 4 of the Act of August 5, 1882 (22 Stat., 255) No other method of carrying out the purpose of the above quoted paragraph than that of employing extra and temporary help in this office is regarded as feasible. The information desired must be obtained confidentially and can only be procured by inquiries proceeding direct from this office. The replies must come to this office and must be compiled and tabulated here. The work is entirely beyond the capacity of the regular force of the office and necessitates the employment of several people for a period of perhaps six months.

Respectfully,

Geo E Roberts

Director of the Mint.

February 28,1903.

The Honorable

The Secretary of the Treasury.

Sir:

The communication addressed to you by the Civil Service Commission under date of February 20th relative to certain irregularities in the employment of unclassified laborers at the Philadelphia Mint, has been reviewed and considered in this Bureau. It is not disputed by the Superintendent of the Mint that unclassified laborers have at times been employed upon the duties regularly assigned to skilled workmen, but most of the complaints of this character have been satisfactorily explained to the Commission, as this letter shows.

The number of skilled workmen employed in each of the departments varies from time to time with the class of coinage being executed and it is customary to supplement the regular force of skilled workmen when reinforcement is required, by the assignment of laborers who can be taken on and laid off or transferred from one department to the other, with less formality than skilled workmen whose employment is subject to the regulations of the Civil Service Commission.

This office has been and is now of the opinion that the Superintendent of the Mint has been endeavoring to observe the Civil Service regulations in good faith and to manage the force under him so as to secure the best results. I am of the opinion that political considerations have not entered into the dismissals which have recently been made.

Referring to the particular inquiry of the Commission concerning three laborers, Robert Halinton, Charles Mensingzer and Napoleon Hearn, who are said not to have been reported to the Commission at all, I beg to advise you that the first two names are evidently intended for Robert Hamilton, appointed April 9th, 1902 and Charles M. Barshinger, appointed July 21, 1902, whose names have been duly reported. Napoleon Hearn was appointed on February 3, 1903. All are unclassified laborers and it is the understanding of this office that they are engaged upon the count of funds now in progress.

The communication of the Commission is returned herewith.

Respectfully,

Geo E Roberts

Director of the Mint.

Referring to the enclosed communication from R. H. Magruder, an employe in the Mint at New Orleans, addressed to the Civil Service Commission, making complaint that he had been furloughed without pay, I beg to say:

Owing to the approaching exhaustion of the stock of bullion in the New Orleans Mint, it has been found advisable to materially reduce the force of that institution, and where practicable to do so, consolidate the duties of clerks and other employes, the sole purpose in view being to conduct the mint more economically. In pursuance of this policy, Mr. Magruder has been furloughed but no appointment has been made to fill his place or to do his work, the duties performed by him being assigned to other employes of the Melter & Refiner's department. Mr. Magruder is only one of eighty-five employes who have been furloughed and whose places have not been filled.

Sir:

At the annual settlement made by representatives of this Bureau with the Mint at San Francisco at the close of the fiscal year, 1901, a shortage of thirty thousand dollars ($30,000.) in gold was discovered and the department duly advised of the fact. As the result of an investigation made by the officials of the Secret Service Walter N. Dimmick, Chief Clerk of the Mint was charged with having stolen the money from the Cashier's vault, indicted by the Grand Jury and in March 1903 was tried and convicted and sentenced to a term of five years in the penitentiary. The said Dimmick had given an official bond for five thousand dollars ($5,000.) and it is recommended that this bond be now laid before the Solicitor of the Treasury together with the facts in the case with a view to having suit brought against the bonding company for the amount of its liability.

The Honorable
The Secretary of the Treasury.

Sir:

I respectfully return a letter by T. B. Rickey of Carson, Nevada, dated April 15, 1903, relative to a demand made by the Department upon Jewett W. Adams, late Superintendent of the Mint at Carson and his bondsmen for $75,549.75, the amount of a shortage discovered in the bullion accounts of that institution during the incumbency of the said Adams as Superintendent. Regarding this claim against Adams and his bondsmen, I beg to say further that the records of this Bureau show that Gov. J. W. Adams became Superintendent and Mr. Hirsch Harris became Melter & Refiner of the Carson Mint on June 1, 1894 and that a shortage was discovered in the Melter & Refiner's department during the ensuing year, official announcement being made February 13, 1895. Mr. Andrew Mason, Superintendent of the U. S. Assay Office at New York was sent by this office to Carson to investigate the reported shortage and as a result of his inquiry John T. Jones, Assistant Melter & Refiner and James H. Heney, an employe of the same department for several years prior to June 30, 1893, were indicted, charged with stealing the missing bullion, tried and convicted and have both served terms in the penitentiary. Mr. Mason reported to this Bureau that the defalcation had all occurred prior to July 1, 1894, when Messrs.

Adams & Harris entered upon their terms of office and that "the present officers and employes of the mint have been completely relieved of the imputation cast upon them."

Referring further to the suit against the said Adams as Superintendent of the Mint, I beg to call your attention to Section 3506 of the Revised Statutes which provides, touching the responsibilities of the Superintendent of the Mint that "the Superintendent ***** shall receive all bullion brought to the Mint for assay or coinage; shall be the keeper of all bullion or coin in the mint, except while the same is legally in the hands of other officers etc." Also to Section 3508 which provides, touching the responsibilities of the Melter & Refiner, that "The Melter & Refiner ****** shall keep a careful record of all transactions with the Superintendent, noting the weight and character of the bullion and shall be responsible for all bullion delivered to him until the same is returned to the Superintendent and the proper vouchers obtained."

The bullion accounts rendered by the Superintendent of each Mint include a statement of accounts between the Superintendent and the Melter & Refiner, which accounts are certified to by the Melter & Refiner over his signature and if the accounts of the Carson Mint now in the office of the Auditor are examined it will be found that the defalcation in that institution is located in the Melter & Refiner's department and that that fact is certified to by the Melter & Refiner. It appears, therefore, that no basis exists for a suit against the Superintendent and his bondsmen.

Respectfully,

Geo E Roberts

Director of the Mint.

Sir:

I have the honor to enclose herewith a copy of a letter from the Superintendent of the Mint at San Francisco asking that an examination be held by the Civil Service Commission to provide a new list of eligibles for service in the Mint. The large amount of coinage now being done at that institution for the Philippine government has made necessary considerable additions to the regular force and has exhausted the present eligible list.

The Honorable

The Secretary of the Treasury.

Sir:

Replying to your letter of April 14, 1903, asking for the necessary recommendations to adjust the force of this office to meet the requirements of the legislative appropriation bill for the fiscal year, 1904, I beg to submit the following:

1. That the salary of John L. Garner, Translator, be increased from $1,400. to $1,600.

2. That Miss M. E. Kelly, Clerk at $1,400 be promoted to the new clerkship created in Class 3, at $1,600 and that the clerkship in Class 2 held by Miss Kelly be dropped. Her last promotion was on July 1, 1901; the work in which she is regularly engaged is that of stenographer but she is capable of doing any clerical work in a superior manner; her record as to punctuality, attendance and attention to duty is excellent, and compared with the other clerks and employes of the Bureau I deem her the best entitled by reason of her ability, experience, zeal and fidelity to the promotion.

3. In the matter of the laborer in the laboratory of this Bureau it is requested that action be deferred for the present.

to each Power by buying a draft on London, China bearing the estimated cost of converting this draft into the money of the country to which payment is made in its chief financial metropolis. Thus, the United States is to receive in all 7.31979 percent. of 450,000,000 Haikwan taels, the tael being reckoned at 74.2 cents or a fixed gold credit of $24,440,778.81. The several payments as they fall due must be met at the rates of exchange current on those dates. The first payment to the United States, due July 1, 1902, was for $498.591.87, and the Commission, collecting the payment in silver, allowed the Chinese Government 55-3/8 cents for the Shanghai tael instead of $0.5661551, the par of exchange reckoning silver at the London price that day. The difference between these two valuations of the tael represented the cost of exchange on London and of converting such exchange in New York at the rates prevailing on that day. If it had been allowed the par value of the Shanghai tael it would have had to pay only 879,182.58 taels instead of 900,391.64, the amount actually collected.

The International Banking Corporation has collected taels at a valuation below par and converted the same number of taels into dollars at New York, still rating the tael below par. Apparently the Bank is turning over to the Government just what it received but in reality it is not. It received a certain weight of silver at less than its cash value and makes a tender to the United States of the same value in gold. It does not turn over the actual silver and its profit lies in the fact that this silver is valued throughout the transaction at less than the par of exchange.

The difference between the Auditor and the Bank exists in the fact that the latter has collected exchange from China and the former holds

I have the honor to report that the Superintendent of the Assay Office of the United States at New York, submits for approval the transfer of Mr. Arthur W. Bennett from the position of Bar Clerk at a compensation of $1,800., per annum and his promotion and appointment as weigh clerk at a compensation of $2,500.00 per annum to take effect from June 1st., vice Samuel H. Graham resigned.

The position of weigh clerk is an excepted one, and subject only to a non-competitive examination.

Mr. Bennett was originally appointed a clerk at $4.00 per diem, in the assay office at New York July 17,1891, and promoted to the position of bar clerk March 18,1897. The duties of bar clerk in the Assay Office at New York correspond in many respects to those of weigh clerk, and by reason of the experience obtained by Mr. Bennett in that position it is respectfully recommended that the non- competitive examination be waived, in the case of his appointment as weigh clerk.

Supplementary to my letter of May 27th, replying to a communication signed by Messrs. W. P. Armstrong and W. W. Rockhill, relative to the exchange value in United States money of the Shanghai tael on the first day of July, 1902 and the first day of January, 1903, I enclose herewith copy of a letter from the Superintendent of the U. S. Assay Office in New York, giving the last short sight selling quotation in New York for pound Sterling exchange on London on the dates named, as shown by the records of three wellknown banking houses dealing in foreign exchange.

Replying further to their inquiries and particularly to the question whether any method of computing the exchange value of the tael other than the one pursued by the Auditor could be suggested by this Bureau, I beg to say that the established and only method of computing the money of one country in the money of another where the cost of exchange is to be wholly eliminated, is by comparing the weight and fineness of their standard coins. Where both monies are of the same metal this is done by calculating the coinage value of one in the other. In the case at hand it is required to ascertain the value of silver taels in U. S. gold dollars and the question might be raised as to where the value of silver should be taken.

The Auditor has taken it in London which is recognized as the most important silver market in the World. It would be difficult and probably impossible to get a quotation on silver in Shanghai that was not directly connected with and dependent upon the price of London exchange. It is not an independent market but follows the London market closely and being supplied from there is usually higher by the cost of transportation.

Under the conditions this Bureau can suggest no better way to ascertain the value of taels in gold dollars if the cost of exchange is to be eliminated, than by comparing the value of the silver contents of the tael in London with the value of United States gold.

Geo E Roberts

Referring to the letter of the Civil Service Commission of February 7th and April 17,1903, requesting to be informed as to the date and authority upon which Mr. Samuel B. Chase re-entered the classified service, in the United States Mint at New Orleans, La., I have the honor to submit the following statement.

Mr. Samuel B. Chase was originally appointed as a deposit melter in the Mint at New Orleans, August 16,1894, at a compensation of $5.00 per diem. On the recommendation of the the n Superintendent of the Mint, Mr. Chas, W.Boothby the position was abolished and Mr. Chase separated from the service September 1,1898. A vacancy existing in the position of assistant weigh clerk, Mr, Chase was appointed to the same February 20,1899 at a compensation of $1,250 per annum.

Mr. Hugh S. Suthon, the present Superintendent of the Mint recommended in October, 1902 that the position of deposit melter be reestablished. His recommendation was approved and Mr, Chase promoted thereto November 6,1902 .

It would appear that the consent of the Civil Service

Commission should have been obtained to the reinstatement, and appointment of Mr. Chase as assistant weigh clerk, under rule IX. It is, therefore, respectfully recommended that the Commission be requested to issue the necessary certificate, covering the appointment of Mr. S. B. Chase as assistant weigh clerk U. S. I have the honor to return herewith the papers relating to the petition of Col. W. H. Byrnes of New Orleans, administrator of the estate of Edward Conery Sr., asking for a remission of the interest which has accrued on the government's claim against the estate on account of the bond of Andrew W. Smythe as Superintendent of the Mint at New Orleans. I also enclose the opinion of the Solicitor of the Treasury upon the question of the authority vested in the Secretary to remit interest upon a claim which has been contested through the courts and has reached a judgment.

It would appear that the only method of relief open to the petitioner is to secure an act of Congress authorizing the remission of the interest. The net amount of the government's claim against Smythe for which the Conery estate is held as the only responsible bondsman, is $23,818. Interest has been running upon this for about ten years and aggregates a large sum. The circumstances of the case are such as have usually been held to warrant relief by act of Congress to the extent suggested, to-wit: the remission of the accrued interest.

TREASURY DEPARTMENT,

The Honorable

The Secretary of the Treasury.

Sir:

Referring to the letters from the Civil Service Commission dated June 20th and June 25th covering an inquiry conducted by the Commission into the operation of Civil Service rules at the Philadelphia Mint and making certain recommendations, I have the honor to respectfully submit the following:

The conclusion reached by the Commission in its letter of June 20th that the "positions of unclassified laborers who have been assigned to classified work in the Mint should be treated as classified vacant positions and filled by certification from the eligible register to be established as the result of an open competitive examination to be announced without delay" is entirely acceptable and the recommendation is hereby made that the Commission proceed to hold such an examination at the earliest practicable date.

The further recommendation submitted by Mr. Kiggins, who conducted the inquiry for the Commission, that "the regulations covering appointments, promotions and transfers in the Mints and Assay Offices be revised with a view to the simplification of the different schedules of positions and the establishment of an apprentice register of eligibles especially for the Mints" is also approved.

The third recommendation submitted by Mr. Kiggins, to-wit: "that the regulations for the employment of laborers proposed for the Philadelphia Post Office be also adopted for the Philadelphia Mint", is held in abeyance for consideration when a copy of these regulations has been submitted to this office.

Replying to the Commission's letter of June 25th, in relation to the case of Francis P. Rodden and others who are alleged to have been irregularly dismissed fromthe Mint, I beg to say that this office will be pleased to take up these cases separately in conjunction with a representative of the Commission and make inquiry into the circumstances attanding each case with a view to the reinstatement of any person whose complaint is found to be justified by the facts. It is respectfully urged, however, that the sweeping reinstatement suggested by the Commission of all persons who have been dismissed since April 30, 1902, would not be to the advantage of the service and I am satisfied that the specific inquiry above suggested into each case will satisfy the Commission that such action will be inadvisable.

The Superintendent of the Mint of the United States at New Orleans, La., submits for approval the temporary appointment of E. J. M. Vauthier, as blacksmith's helper at a compensation of $2.50 per diem, vice Albert G. Jones resigned, to take effect from July 27,1903.

I have the honor to recommend that the Civil Service Commission be requested to consent to the temporary appointment of Mr. Vauthier as blacksmith's helper in the Mint at New Orleans, for a period of three months or pending the establishment of an eligible register.

Inclosed herewith find letter of the Secretary of the local board of civil service examiners at New Orleans stating" that there are no names on the eligible list for the said position."

Sir:-

The Superintendents of the Mints at San Francisco and New Orleans having failed to render their Expense Accounts for disbursements for the month of June within the ten days required by law, I have the honor to submit the following explanation:-

The delay was caused in each case by the great amount of labor devolving upon the bookkeeper in consequence of the annual settlement at the close of the fiscal year.

In view of the above fact it is respectfully requested that the advances for these institutions for the current month be authorized, as the funds are required to meet the necessary expenses.

In reference to the failure to forward from this Bureau to the Auditor for the Treasury Department, for settlement, within the twenty days required by law, the Expense Accounts of the late Assayer in Charge of the U.S. Assay Office at Charlotte, N.C., for the month of June, I have the honor to submit the following explanation:-

The failure was due to the fact that the accounts as originally rendered contained various items of expenditure which it was necessary to eliminate, and which necessitated the returning of the accounts for correction.

In view of the above fact it is respectfully requested that the advance for the current month be authorized, as the funds are required for necessary expenses.

To the Honorable
The Secretary of the Treasury.

Sir:-

The requisition for funds for the Salaries, Wages, and Contingent Expenses at the New York Assay Office for the current month has been returned to this Bureau by the Auditor for the Treasury, with the following reason for disapproving the same:- "because the bullion account for 4th quarter, 1903, was not sent to the administrative office within the time required by law".

In explanation of the delay in forwarding the June quarter's bullion accounts, I will state that it is almost impossible for the bookkeeper at the New York Assay Office to get his accounts to the administrative office within the time required by law because of the great amount of work devolving upon him during this quarter, in the annual settlement at the close of the fiscal year.

In view of the above fact, I respectfully request that the advances for the current month be authorized, in order that the Superintendent of said office, may meet the necessary expenses of that institution.

Assay Office at Helena, Montana, and which has been disapproved by the Auditor for the Treasury for the reason that the statistical expense account of said officer was not forwarded from this Bureau within the time required by law, I would respectfully submit the following explanation.

The delay was caused by the absence on official business of the Clerk having charge of these accounts.

In view of the above, it is respectfully requested that the advance be authorized as the funds are needed to meet current expenses.

I have the honor to report that the Superintendent of the Mint at San Francisco, owing to the exigencies of the service and the absence of an eligible register from which to make selection for the positions named, has made the following temporary appointments to take effect from August 1st,1903:

Coiner's Department.

A. J. Baker,	Helper,	$3.50 per diem.
W. E. Pollock,	"	3.50 per diem.
C. D. Harding,	"	3.50 per diem.

The Honorable

The Secretary of the Treasury.

Sir:

Referring to a communication from the Civil Service Commission dated August 14th, in which inquiry is made concerning the alleged promotion of Joseph A. Wild, a machinist in the Mint at New Orleans to the position of Superintendent of Machinery, I beg to enclose herewith copy of a letter from the Superintendent of the Mint at New Orleans, dated May 18th, in which Mr. Wild is named for the position of Foreman of Machinists, and of my letter of May 28th, approving the appointment. Also copy of a letter from the Superintendent at New Orleans dated August 21st on the same subject, and I have the honor to request that these be forwarded to the Commission.

I beg to say further that, in my judgment, this action is in harmony with the spirit of the Civil Service requirements and for the best interests of the service. The force at New Orleans is a small one as compared with that at San Francisco and Philadelphia. At the two latter institutions we have "Superintendents of Machinery" whose duties are such as to keep them fully occupied without personally laboring in the machine shop. At New Orleans we simply want one of the machinists designated to have charge of the force but want him to work as a machanic

in the shop himself. The designation "Foreman of Machinists" is therefore a proper title for him.

Tatem, Assayer in Charge, U.S. Assay Office at Helena, Montana, which have been disapproved by the Auditor for the Treasury Department, for the reason that his accounts for collection of mining statistics were not rendered within the prescribed time, I would state that the delay was caused, in part, by the absence of the Assayer in Charge, and in part by the great amount of work devolving upon the bookkeeper of said office at this period of the year.

In view of the above facts and as the accounts referred to have been rendered and are now in the office of the Auditor for the Treasury, I would respectfully ask that the advances be authorized.

The Auditor for the Treasury has disapproved the requisition in favor of the Superintendent of the Mint of the United States at San Francisco, for the sum of $55,000 to meet the estimated expenses for the current month for the reason that if allowed, his debits would exceed the amount of his bond viz $100,000. I have the honor to report that the sum for which requisition has been made is necessary, and to request that the same be approved.

In view of the fact that the Superintendent of the Mint at San Francisco has in his custody, at all times, gold and silver bullion and coin aggregating in value nearly $180,000,000 it is respectfully requested that hereafter the Auditor for the Treasury be authorized to approve requisitions in favor of the Superintendent of that institution for funds to meet the expenses thereof, providing the amount due from him on account of advances for expenses is not over $100,000 in excess of his bond.

In reply to the letters of the Civil Service Commissioners of August 14th and September 17,1903, requesting information with reference to the temporary appointments of Gustavus Meyer as clerk, and Frederick J. Atwood as bullion sampler, in the assay office at New York, I have to respectfully submit the following statement.

Under date of June 3, 1903, the Superintendent of the assay office at New York submitted for approval the promotion of Gustavus Meyer from the position of workman, schedule D, at $3.50 per diem to that of clerk, Schedule C at a compensation of $4.50 per diem, but by an oversight in this Bureau, the Commission was not advised of the appointment or requested to hold the non-competitive examination required in such cases, and I respectfully recommend that the Civil Service Commission be requested to hold an examination as early as practicable, to test the fitness of Mr. Meyer for promotion.

In the matter of the temporary appointment of Frederick J. Atwood as bullion sampler (Schedule D) it is respectfully stated that the exigencies of the service made this appointment necessary, and in the absence of an eligible register, from which to make a selection, Mr. Atwood was appointed temporarily, but the consent of the Commission does not appear to have been obtained thereto. I have the honor to recommend that the civil service commission be requested to consent to the temporary appointment of Frederick J. Atwood, as bullion sampler at the New York Assay Office for a period of three months from July 6, 1903, or pending the establishment of an eligible register.

I enclose certificate of the Secretary of the Local Board of Civil Service Commission, New York, that no eligible register existed for the position of bullion sampler.

I have the honor to request that you will submit to the Comptroller of the Treasury for an opinion as to whether the amounts charged and collected for the manufacture of the silver and minor coins authorized for the Philippine Islands, by the acts of Congress approved July 1,1902, and March 2, 1903 must be paid into the Treasury of the United States as a miscellaneous receipt, or can the amounts received be covered into the Treasury to reimburse the appropriations for wages of workmen and contingent expenses of the Mints at which the coinage is being executed.

I would respectfully state that unless the amounts received for the coinage executed for the Philippine Islands can be applied to reimburse the appropriations for Wages of Workmen and Contingent Expenses of the Mints at Philadelphia and San Francisco, it will not be practicable to continue such coinage as it would deplete the appropriations to such an extent as to interfere with the domestic coinage necessary to meet the public requirements.

To the

Sir.-

I have the honor to submit herewith the estimates of appropriations that will be required for the Mint and Assay service during the fiscal year 1905. The estimates submitted call for appropriations of $1,244,[illegible]20, as against $1,28[illegible] 0, 170 ~~790~~. appropriated for the fiscal year 1904.

In explanation of the increase in certain appropriations requested the following is respectfully submitted.-

Bureau of the Mint.-

An increase of $400 is submitted in the salary of the translator and $200 in that of the assistant in the laboratory of the Bureau. Experience has shown it is difficult to retain the services of competent translators at the salary of $1,600 as at present paid,, and for this reason the increase is submitted . The salary of $1,200 paid the assistant in the Laboratory is not equal to that paid other assistants in the mints and assay offices and an increase is respectfully submitted.

Mint at Philadelphia.

An increase of $200 in the salary of the Register of Deposits is requested as the services performed are of a responsible nature.

Mint at San Francisco.

An increase of $500 in the salary of the Bookkeeper is submitted . The position is one of great responsibility and onerous duties, and the compensation should be the same as that paid the Bookkeeper at the Mint at Philadelphia, viz. $2,500.

An increase of $5,000 in the wages of workmen of this mint is asked . It is necessary this should be granted for the efficiency of the service.

New York Assay Office.

An increase of $250 is respectfully submitted in the compensation of the first assistant assayer on account of the large amount of technical work that devolves upon him.

An increase of $2,500 is submitted in the appropriation for wages of workmen of this institution . This is necessary for the efficiency of the service, as the amount of work at this institution makes it necessary to increase the force of workmen slightly.

October 31,1903.

To the

Honorable the Secretary of the Treasury.

Sir.-

Referring to the estimates of appropriations that will be required for the support of the Mints and Assay Offices of the United States for the fiscal year ending June 30,1905, forwarded to you from this Bureau on the 14th instant, it is desirable the same be amended in the following particulars.-

Mint at NEW ORLEANS.-

For salary Assayer in Charge $3,000 instead of $2,500.

There are stored in the vaults of the Mint at New Orleans $26,500,000 in silver coin which before the close of the current fiscal year will be increased to at least $30,000,000 by the coinage of silver bullion on hand and for the lack of vault room , there is no probability of this coin being transferred from the vaults of the New Orleans Mint in the near future.

The Assayer in Charge would, therefore, be held responsible for the safe keeping of the same and the salary should in a measure, be commensurate with the responsibilities imposed upon him.

MINT at PHILADELPHIA.

An increase of $100 in the salary of the clerk to the cashier is submitted. The duties of the position are of a responsible nature, and in case of the absence of the cashier, from any cause, the clerk is required to perform the duties.

Assay Office of the U. S. at NEW YORK.

An increase of $250 in the salary of the cashier and for an assistant cashier at a salary of $1,800 per annum is submitted.

The large volume of business at the New York Assay Office makes the position of the cashier a very responsible and laborious one. The deposits of gold at this institution are about 10,000 per annum, and of silver 3,000 for which payment is made by the cashier in coin or bars, over the counter, or for gold deposits by check on the Assistant Treasurer of the United States, which involves much hard labor, and the salary of the position should be made $2,500, and provision also made for an assistant cashier at a salary of $1,800 per annum.

With the addition of the above named sums the estimates submitted will call for appropriations of $1,246,670 as against $1,280,170 for the fiscal year 1904.

Since the defalcation in the Mint at San Francisco due to one of the subordinate officials, the surety company which has made the Superintendent's bond, has raised its charge to $300. per year for a bond of $100,000. The Superintendent asks permission to furnish a new bond which he can get at a lower rate and offers a name of a well-known bonding company which is acceptable to the department. The regulations of the department, however, forbid the changing of a surety oftener than once in four years. In view of the fact that this request for a change is due to the action of the company in raising its rate, I respectfully recommend that the regulation be waived in this instance and Mr. Leach permitted to make a new bond.

The Superintendent at New Orleans informs me that he is paying $100. a year for his bond of the same amount and this, I understand to have been the former rate to Mr. Leach.

To the
Treasurer of the United States.

Sir.-

The American Smelting and Refining Company, largest sellers of bullion for Philippine coinage both at the mints at Philadelphia and San Francisco, desire to have payment for silver delivered by them to the Mint at San Francisco, paid by telegraphic transfer upon New York, and in order to comply with the requirements of the Treasury Department, they have executed a power of attorney to the London, Paris and American Bank, Limited, to act for them. That is to receive and receipt to the Superintendent of the Mint for his check on the assistant treasurer at San Francisco, and to endorse and deposit same with that officer that the amount may be paid by telegraphic transfer on New York.

It is respectfully requested that you will give such instructions to the Assistant Treasurer United States at San Francisco, as will promote the prompt transfer by wire, and payment in New York to the American Smelting and Refining Company, the amount of checks given from time to time by the Superintendent of the Mint at San

Francisco, to said company, for silver bullion purchased for the Philippine coinage .

Mr. W. E. Andrews,
Auditor for the Treasury Department.

Sir:

Your communications addressed to the Superintendents of the Mints at Philadelphia and San Francisco and to this office relative to the practice of paying a portion of the clerical force and other employes in the Mints from the sum appropriated for Wages of Workmen and Adjusters, has been duly considered. I beg to say upon the subject that the estimates submitted to Congress for the fiscal year beginning July 1st, 1904, have been altered so as to avoid the criticism which you have made and which is perhaps in a measure justified.

The practice which has prevailed in the mint service heretofore has been due, I assume, to the fact that the Coinage Act regulating the service plainly contemplates that the Superintendents of the Mints shall fix the compensation of all the employes who are appointed by them, subject to the approval of the Director of the Mint and the Secretary of the Treasury. The clerical force is specifically named in the act. It appears to have always been the practice in this service to pay the clerks and all other employes except those whose duties are in some degree administrative, from the lump appropriation. The list of persons whose salaries have been fixed by Congress has been a mere skeleton of the force. The minor clerks have been regularly paid a per diem. In view of this long established practice and the fact that the present

Superintendents have simply followed in what they assumed to be the approved methods of their predecessors and the further fact that to insist upon your recent ruling will necessarily suspend operations throughout the mint service, I respectfully urge that you approve and pass the accounts which are now held up in your office.

Sir.-

Genuine Mexican silver dollars ought not to leave a residue of carbon on solution in nitric acid, and there is no reasonable probability that counterfeits would do so. Mexican silver coinage however, is noted for containing small amounts of gold. On solution in nitric acid this gold is left behind as a dark or black residue. Sometimes there is enough gold present to separate in bulky flocks, particularly on slowly dissolving in dilute acid, from which the solution can be decanted.. These flocks can then be washed by decantation, collected in a crucible, dried, and annealed, when the bright yellow color of metallic gold is clearly brought out. But the amount present is often so slight that, particularly on rapid solution, of the silver, the residue is very finely divided and therefore very bulky and light. The slightest disturbanceof the solution will set it in motion and it floats about in the solution in a very deceptive way. It might easily be mistaken for carbon on casual examination.

Prof. Freer's residue was undoubtedly gold and not carbon.

RG104 E-235 Vol 300

If he will carefully filter it off on a very close filter, wash thoroughly and cupel with a small amount of test lead, free from silver, he will certainly get a minute yellow globule of gold.

In determining the fineness of our own silver coin, it is not unusual to find a slight residue of gold on dissolving in nitric acid.

I have examined twelve of the seventeen Mexican silver dollars recently received from the New York Assay Office for the presence of lead. There were two coins for each of the years 1897 to 1902 both inclusive examined. Operating on a ten gram sample, one of the 1897 coins showed 0.301 per cent of lead, and one of the 1902 coins showed 0.031 per cent of lead. The remaining ten coins were examined qualitatively, using about ten grams in all cases but one in which, only five grams were used, and every one of them showed the presence of lead.

I have also made a couple of examinations of our own silver coins and found lead in both cases.

I transmit herewith the five remaining Mexican dollars, all of 1902.

Respectfully,

Frederic P. Dewey, S.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, March 21,1903.

Hon. George E. Roberts,
Director of the Mint,
Washington.

Sir:

I have made a very elaborate and exhaustive examination of the sample of Silver King crude ore submitted by Senator Kearns of Utah and have to report as follows:

This ore is a very difficult one to decompose. I made two attempts upon it by the ordinary acid treatment and found by appropriate tests that the ore was not decomposed and that good separations of the metals could not be obtained in that way so that I reached the conclusion that it would be impossible to make a satisfactory analysis by acid decomposition.

I also attempted to decompose the ore by prolonged digestion in sulphides of sodium. The results were perhaps better, but still not satisfactory.

In my opinion, based upon the results obtained by three different methods of decomposition, the only way to decompose this ore is to fuse it up at once with sulphur and carbonate of soda. This will completely decompose the ore and on dissolving the melt in water, a good and clear separation of the arsenic and antimony from the lead etc. is at once obtained.

By decomposing the ore in this way I obtained the following results:

Arsenic.	0.45%
Antimony	1.12%
Lead	43.51%
Copper	0.92%
Bismuth	Slight Trace.

In nearly every instance double separations were made and each step of the analysis was carefully observed and controlled by appropriate tests. This has made the analysis very long and tedious, but the results obtained are thereby much more exact and satisfactory.

This ore is entirely unsuited for the determination of the lead by the method of fire assay. Under ordinary circumstances it is well understood that this method gives low results and the buying and selling of lead ores at the West is based upon this understanding. In the case of this ore, however, all the above metals would be more or less reduced and pass into the lead button and thus increase the figures given for the percent. of lead found. Moreover, the amount of each metal going into the lead button would vary with the method followed in working the assay and particularly with the choice of fluxes used in each case. Therefore, the fire assay results would be very discordant and in some cases the button produced could easily give a higher percentage for the lead than that actually present instead of being about 1.5% less than the actual amount as is the usual expectation in the fire determination of lead.

Frederic P. Dewey,

June 6,1903.

Hon. F. P. Sargent,
Commissioner of Immigration,
Treasury Department.

Sir:

One of the duties assigned to this Bureau is that of making an annual estimate of the stock of United States coin in the country and in making this calculation it is desirable to know as nearly as possible, the amount of such coin carried out of and brought into the country by travelers and immigrants, and it is also of value to be informed upon the amount of foreign coin brought into the country. In this connection I beg to inquire whether any record is kept by your officials of the amount of United States coin that is shown by immigrants at the ports of arrival. I note in your last report that during the fiscal year ended June 30,1902, the amount of all kinds of money shown by immigrants, was $10,485,911. I would be gratified if you would inform me concerning this, whether, first, this was all in actual cash or part in bills of exchange or bank drafts. Second, what proportion of it was in United States coin and what in foreign coin. If an accurate reply cannot be given I would be glad to have an approximate statement or estimate, particularly for the port of New York.

I would also be pleased to have inquiry made of the firm which has the privilege of exchanging money at the immigrant station in New York as to the amount of foreign coin received by him from immigrants for such length of time as his record runs, and if he has any information as to the amount of United States coin brought in by the same people, I would be glad to have that. If he can give it, I would like to have the statement include the number of people from whom he received foreign coin as well as the amount, as by this method, if it covers considerable period of time, an average may be calculated which in the absence of further information will be of some value.

I am interested to know whether the foreign coin received at the exchange office is commonly sent to the United States Assay Office on deposit or disposed of by re-shipment to foreign countries or by sale to outgoing travelers. It would be interesting, furthermore, to have the opinion of your experienced officials as to whether any considerable proportion of the immigrants exchange their money abroad for money of the United States instead of waiting until they arrive on this side.

Thanking you in advance for this information, I am,

In order to definitely determine the dimensions of the traveling crane for the engine room, U.S.Mint building, Denver, Col.; Mr. Box, Supt.Denver Engineering Works, representing the contractor, Alfred Box & Co., Phila.,Pa.; Mr. Ullery, Superintendent of Construction of the Mint building and Mr. Healy, representing the Mint Bureau, have taken measurements of the engine room and agreed on a dimension of 28'-10" as the width, in the clear, of that part of the engine room as covered by the crane travel.

I will thank you to notify your Superintendent of Construction of the Denver Mint building that the above mentioned dimension should be held to as near as possible to do so, as the crane bridge is now under construction, with the length of same based on this dimension of 28'-10".

To the

Sir.-

I enclose herewith copies of letters from the Superintendent of the Mint at Philadelphia, and the engraver of that institution upon the subject of providing additional space in the mint for the medal department. The amount of work required of this department is increasing rapidly, and the quarters originally provided for it have become inadequate.

More presses must be purchased and not only is there no room for them in the present quarters, but it is impracticable to place the heavy presses required for this work upon the second floor of the building. The heaviest press now in use is necessarily kept on the basement floor. The Superintendent and Engraver concur in the opinion that the empty space surrounding vaults in the basement would make an admirable work room for this department, and urge that it be properly lighted and assigned to this purpose. This office sees no reason why the space may not so be utilized, and respectfully asks that you take up the matter for consideration and give opinion upon the feasibility of the proposition.

Oct. 21,1903.

The Supervising Architect,
Treasury Department.

Sir:-

Forwarded herewith are two prints showing new work required in order to properly install the traveling crane for engine room, U. S. Mint building (new), Denver, Colo.

It is necessary that two boxes, 18"x 12" x 9" deep, be set into side walls of engine room at places as designated on drawings, in order to withdraw shafts on which crane bridge wheels revolve.

In case that anything should happen to motors on bridge trolley, and parts have to be removed, the whole crane would have to be taken down to remove motors or parts, unless a 3' x 3' hatchway is cut through floor at point as shown on drawing. The crane had to be made as a special in order to run close to ceiling and give the necessary hook hoist travel at the doorway into engine room.

A full size section of the crane runway is shown on drawing together with position of crane bridge wheels and design of beam clamps for holding eye beam runways in place at ceiling.

The crane in question was shipped from shops of builder at Phila., Pa. to the mint building on the tenth day of this month, and it is recommended that this new work as listed above be carried on before or while crane is being erected in place at the building.

The crane builder, Alfred Box & Co., Phila., Pa. has requested that he be given official permission, either by letter through this office or from the Superintendent of Construction at the building, to cut all necessary holes at ceiling beams in order to install beam clamps, etc.; all cutting to be restored to its original finish by the crane builder. I will thank you to inform this office in regard to action that you take in this matter.

The Director of the Mint,

Sir:-

By chance I have become acquainted with the fact that bids have been invited on certain motors, starting boxes, etc., the same to be paid for from the appropriation for new machinery, mint at Denver,Colorado, and wish to place the following statement on record in this office in regard to this material, as I am supposed to have charge of the equipment and installation of machinery at the Denver Mint.

1. Relating to the three 50 H.P. motors.

To rewind the 500 volt motor to a 220 volt machine would be bad engineering practice, as cost of same would amount to about 3/4 of the first cost of motor (say from $600. to $700.) besides having a made over, second hand machine to place on a new rolling mill. The three 50 H.P. motors would be second hand machines when delivered at the Denver Mint. There is now under contract and nearly completed, at the Westinghouse shops, a 60 H.P., 440-220 volt motor-generator set. If the Denver Mint appropriation is to be drawn from for the St. Louis Exposition exhibit, this set could do all the work that is required, and it would be cheaper to instal this set, even if a small 440 volt machine had to be purchased to furnish current for operating crane, etc., at Denver Mint, than to pay for rewinding the 50 H.P. motor.

2. Two motors of 10 H. P. each and one of 7-1/2 H.P. are called for under the specifications in question. If any of these three motors are to be installed for driving blowers, I wish to ask that bids for these three motors, which would necessitate all, of the motors be rejected. If the blowers as made by the American Gas Furnace Co., or as made by any firm building similar blowers, are in mind for the Denver Mint installation, it would logically follow that gas machines that were built to operate together with the blowers, as made by the successful bidder, would be accepted. An expensive gas machine, as installed at the Philadelphia Mint, would require naptha that costs about 20 cents per gallon, in Denver, to run machine, also special blowers, each fitted with a motor: on the other hand it is my opinion that a comparatively cheap oil apparatus, using distilled oil that costs about 7 cents per gallon, in Denver, would do all the minting work, and use air taken from the compressed air plant, as now contracted for by the Supervising Architect, thus making a saving of at least 50 % in cost of fuel together with cost of all blowers and motors for same. This same question applies in regard to motors for driving rolls of strip annealing furnaces. Motors should not be bought for this work until the character and make of the furnaces have been decided on. The cost of operating a plant, for melting and annealing, involves a sum of money, in amount large enough to warrant serious consideration of this subject.

3. I wish to call attention to a clause in the motor specifications stating that motors must occupy a certain space. In the case of the 3 H.P. motors for the cutting presses and of motors for other machines, the drawings and patterns for machines as

furnished for the U. S. Mint, San Francisco, were made, before bids were invited, to fit one make of motor only and this make of motor although not from the lowest bidder, was accepted. This procedure should not be followed, and can be prevented by omitting the clause in question, as patterns can be changed at a small cost.

4. I have at hand several letters designating or stating that I am the engineer in charge of the equipment of the new mint building at Denver, and for the purpose of preventing confusion and mistakes I respectfully ask that I be allowed to initial all letters containing matter pertaining to the above mentioned equipment, also be informed in regard to any work similar to the issuing of proposals for motors, etc., as mentioned in this letter.

The floor of the room now used for striking medals is heavily overloaded and as more space is desired and heavier machinery is to be installed in the near future it is desired that some definite action be taken as soon as possible to do so.

In the opinion of this office any money available for work at the Phila. Mint should be first applied to necessary work; for this reason it is recommended that the contract for decorating, etc., be held back until the cost of the change in position of the medal press room is decided.

I will thank you to take immediate action in this matter.

To the
Solicitor for the Treasury.

Sir:

Replying to your communication of the 25th instant signed by F. A. Reeve, Assistant Solicitor, relative to the shortage discovered in the bullion accounts of the Carson Mint during the term of Jewett W. Adams as Superintendent, and the suit pending against the said Adams and the sureties on his bond, dated April 25th, 1894 and April 30, 1898, I beg respectfully to say:

Jewett W. Adams assumed the duties of the Superintendent of the Carson Mint on the first day of June, 1894, and Mr. Hirsch Harris became Melter and Refiner at the same date. Bars of gold and silver bullion remaining in the hands of the previous Melter and Refiner, E. B. Zabriskie, were transferred to Mr. Adams and from him to Mr. Harris at the same weight and fineness at which they had been credited to Mr. Zabriskie in closing his account. In the following January it was discovered that some of these bars were actually of lower fineness in gold than they had been valued at in the settlements and an investigation made by Mr. Harris and supplemented and verified by Andrew Mason, Superintendent of the United States Assay Office at New York, who was sent to Carson by the Director of the Mint, revealed that the gold bullion had been short at the time of the transfer to said Adams and Harris to the amount of 4,060.799 ounces standard ($75,548.75). Mr. Mason's examination of the books showed that stealing had been going on from 1891 up to and including the month of May, 1894. In his report to the Director of the Mint, Mr. Mason declared that " the present officers and employes of the mint have been completely relieved of the imputation cast upon them.".

John T. Jones, Assistant Melter and Refiner from 1891 to June 1st, 1894, and James H. Heney, an employe in the Melter & Refiner's department previous to June 30, 1893, were indicted, tried and convicted of stealing the missing bullion and have each served a sentence of eight years in the penitentiary.

In view of these facts it is the opinion of this Bureau that the government has no cause of action against Jewett W. Adams whose term of office began June 1, 1894, under whose administration the thefts were discovered and who furnished every assistance in his power to the government in uncovering the crime and punishing its perpetrators.

Respectfully,

Geo E Roberts

Director of the Mint.

December 1,1903.

To the
Solicitor for the Treasury.

Sir:

I beg to acknowledge receipt of your letter of November 30, in relation to the suits brought against Jewett W. Adams and his bondsmen in Nevada for the amount of the shortage in the Melter & Refiner's department of the Carson Mint, discovered in 1895.

In reply to your inquiries and in further explanation of the shortage I would say that Jones and Heney, the employes of the Melter & Refiner's department who were afterwards convicted of the theft, did conceal their operations by substituting in place of the genuine gold bars, bogus ones of a lower fineness. When Mr. Adams became Superintendent and Mr. Harris, Melter and Refiner on June 1, 1894, these bogus bars, stamped with the weight and fineness of the original, genuine bars were turned over to them and accepted and accounted by them as genuine bars until some months later when they were sent to the refinery and their bogus character there revealed.

It is true that from the 12th day of April, 1895, which was at the close of the investigation instituted by the Director of the Mint through his representative, Mr. Andrew Mason, the shortage was recognized in the daily mint reports, copies of which were sent daily to the Director of the Mint, the item appearing as follows: "Melter

& Refiner's shortage $75,549.75." This entry was continued daily until September 30,1895, when the following letter was sent to Superintendent Adams :

TREASURY DEPARTMENT,
Washington, Sept. 27,1895.

J. W. Adams Esq.,
Superintendent, U. S. Mint,
Carson, Nevada.

Sir:

I have examined and referred to the proper accounting officers of the Department for examination and settlement, your bullion accounts for the quarter ended June 30, 1895, with my approval.

In your next quarter's accounts you will please open a new account termed "Embezzlement Account." You will debit this account and credit "Gold Bullion account" with the amount of the Melter and Refiner's shortage, viz: 4,060,799 standard ounces, value $75,549.75.

Very respectfully,
(Signed) R. E. Preston.
Director of the Mint."

Under these instructions a new account termed "Embezzlement Account" was opened and debited with the amount of the Melter & Refiner's shortage, $75,549.75., and the gold bullion account was credited with the same amount, balancing that account.

From and including September 30, 1895, the daily mint report carried the item "Embezzlement Account, $75,549.75."

The investigation by Mr. Mason completely exonerated the officers then in authority at the Mint, to-wit: Messrs. Adams and Harris, and located the entire shortage as having occurred prior to their entrance into office on June 1, 1894, the stealings extending back as far as 1892. The entire shortage was accounted for by the difference between the value of the original gold bars in the Melter & Refiner's

RG104 E-235 Vol 300

department and the value of the bogus bars which were manufactured by Jones and Heney and substituted in place of the former. Several pages of the Melter & Refiner's record of operations had been taken out and other records erased and mutilated to conceal this substitution but the procedure of Jones and Heney was completely traced at the trial and their methods exposed, resulting in their conviction and a sentence of eight years in the penitentiary for each of them.

December 11,1903.

Hon. Geo. E. Roberts,
Director of the Mint.

Sir ,-

Referring to my letter of November 27th regarding the last silver settlement bar, and to the reply of the Superintendent of the Philadelphia Mint of December 4th. with enclosures, I beg to call attention to the enclosure of the weigh clerk. From this it appears that the weight of the settlement bar, given in the report of the Philadelphia Mint, dated November 19, 1903 as 32.42 ounces, after melting, is not an actual weight, but is a figured weight. This weight was obtained by taking metal which belonged to the United States coin account, and transferring it to the Philippine coin account.

Your instructions to this laboratory have been very explicit that under no circumstances should the Philippine coin be mingled with the U. S. coin, and we have taken unusual pains to follow your instructions. It would, therefore, appear that the melting of these two kinds of coin into one bar, and then figuring all the losses of all the operations onto the U. S. coin was not an equitable proceeding.

Undoubtedly also the Philippine coin reduced the fineness of the bar.

I would, therefore, request that the .82 ounces standard, transferred from the U. S. coin account to the Philippine account by the Philadelphia Mint be returned to the United States account and that the .82 ounces standard loss in assaying be charged as an item of expense in the Philippine account.

Respectfully,

Fredric P. Dewey.

Sir:

The owner of the building in which the U. S. Assay Office at Seattle is located is asking for an increased allowance for rent. I would be greatly obliged if you would ask your Superintendent of Construction at that place or any other representative of your office who may be about to visit there, to make inquiry and report for the information of this office upon what is the present fair rental value of the premises occupied by the Assay Office.

Very truly yours,

Sir:-

In the opinion of Mr. Healy of this office the present arrangement of the ash hoist, Denver Mint building, is unsatisfactory. The hoist as now installed allows very little space for dumping ashes into the boot of casing; if the hoist was turned so that the discharge was to the South this objection would be done away with.

Letters Signed by Secretary.

Treasury Department,
Office of the Secretary,
Washington, D. C., January 2,1903.

To the Honorable
The Secretary of State.

Sir.-

I have the honor to hand you herewith a series of interrogatories, prepared by the Director of the Mint, regarding the production, coinage, and consumption of gold and silver, as well as other monetary matters, and to request that a copy of the same be transmitted to the Ambassadors and Ministers of the United States accredited to the various foreign countries. I have also to ask that a copy be sent to the following consulates of the United States.-

Adelaide, Australia.
Alexandria, Egypt.
Cape Town, Africa.
Cayenne, French Guiana.
Hobart, Tasmania.
Melbourne, Australia.
Pretoria, South Africa.
Toronto, Canada.
Auckland, New Zealand.
Brisbane, New South Wales.
Calcutta, India.
Demerara, British Guiana.
Johannesburg, South Africa.
Paramaribo, Dutch Guiana.
Singapore, Straits Settlements.

The information received in reply is for the use of the Bureau of the Mint, which has for a number of years collected and published statistics relating to the production of gold and silver and monetary matters in general. To facilitate the compilation of the statistics as well as the publication of his report, it is respectfully requested that you will give instructions for the replies to the interrogatories to be forwarded direct to the Hon. George E. Roberts, Director of the Mint, Treasury Department, Washington, D. C.

It is suggested that the possible sources of information regarding the subjects be enumerated for the guidance of the foreign representatives.-

they are: treasury departments, mints, statistical, mining and geological bureaus, divisions of trade, commerce and customs, also scientific societies, especially mining and engineering. I make this suggestion because it has been found in some cases that, where it was impossible to get the information from one source, the matter was dropped, although data might have been obtained elsewhere.

It is very desirable that replies to interrogatories 13, 14, 15 and 16 be procured and forwarded as early as practicable.

Respectfully,

DIV. S., P., AND B.

February 26,1903.

To the Honorable

The Secretary of War.

Sir:-

Referring to your letter of the 3rd instant, enclosing copy of a communication from the"Government of the Philippine Islands requesting for the Bureau of Government Laboratories at Manilla, analyses of Mexican dollars of undoubted origin and various dates from 1897 to 1902" and also that there be forwarded five Mexican dollars, I have the honor to submit the following in reply:-

Under instructions the Superintendent of the Assay Office of the United States at New York, procured and forwarded to the Department, two Mexican dollars of the coinage of 1897, 1898, 1899, 1900, 1901, and some of the coinage of 1902.

Two pieces of each years coinage were assayed in the laboratory of the Bureau of the Mint for the purpose of making the following determinations:

1st., whether genuine Mexican dollars on solution in nitric acid leave behind a residue of carbon.

2nd., whether genuine Mexican dollars contain any traces of lead.

From the report of the Assayer of the Bureau of the Mint, see copy enclosed, the first inquiry is answered in the negative, and the last in the affirmative.

It was not thought necessary to make an assay of these coins to determine their silver contents, as the Mexican coinage law of November 27, 1867, Article 4 provides that all the silver coins should contain the fineness of 0.902+ (0.777 of 0.001).

In exceptional cases and not as a general rule the "tolerance" or difference allowed more or less "Mint remedy" for fineness in the silver coins must not exceed 0.003 of the legal fineness of - 0.902+ (0.777 of 0.001) equal to 902 7-10+, therefore the Mexican dollars may, in exceptional cases, legally vary in fineness from 900 8-10 to .903 .

I transmit herewith for payment the account of Messrs. Handy and Harman, 32 Nassau Street, New York, for seventeen Mexican dollars @ $0.40 each = $6.80.

Enclosed herewith you will also find five Mexican dollars of the coinage of 1902, and 6 43-100 ounces of clippings from the twelve (12) coins used by the Assayer in making his determinations. The Mexican dollars used were of undoubted origin.

Respectfully,

Acting Secretary.

Hon. J. B. Foraker,

United States Senate.

Sir:

In reference to the letter addressed to you by Mr. John C. Dueber, President of the Dueber Watch Case Manufacturing Company, Canton, Ohio, complaining that rival manufacturers of watch cases were accustomed to stamp their cases as of a certain fineness per United States assay, I beg to say that insofar as such a stamp conveys the idea that the government assays and certifies to the fineness of watch cases or gold and silver plate, the same is a fraud. There is no law providing for such service to the public by any department of this government, although such is the case with several foreign governments. A pretension by a watch case manufacturer that his goods have been assayed and stamped by the government, althogh a misrepresentation to the public, is not, however, an offense against any statute and the Treasury has therefore, no direct or particular interest in such representation and does not feel called upon to make any recommendation upon the subject. It is properly one for Congress to consider and deal with as it may deem for the best interests of the public.

The letter of Mr. Dueber with accompanying circulars is herewith enclosed.

I have your letter of the 22nd instant in reference to a government exhibit of gold bars at the World's Fair in St. Louis, and in reply I beg to say that gold deposits at the Denver Mint or at any other Mint or Assay Office, become cash in the Treasury as soon as they are paid for by the government and are subject to all the statutes that apply to the safekeeping of government monies. All of the gold bullion on hand in the Mints and Assay Offices is included in the daily statement of cash in the Treasury. There is no authority of law under which this bullion could be made an exhibit at the World's Fair or deposited or kept in any other place than in one of the offices of the Treasury.

March 16,1903

To the Honorable

The Secretary of War.

Sir.-

In countries having more than one coinage mint, it is customary to place on the coins, a letter to indicate the Mint at which the same were manufactured, for instance,-on all domestic coins struck at the United States Mint at San Francisco, Cal., the letter "s" appears on the reverse, and on the coins struck at New Orleans, La., the letter "o". There is no mark, however, upon the coins manufactured at Philadelphia, Pa., which appears to be due to the fact that there originally being but one mint in the country, it was not thought necessary to place any distinguishing mark upon the coins. The coins made at the mint at Philadelphia are known by the absence of any mint mark.

I have the honor to request that you will inform the department if it is your desire that a mint mark should be placed upon the Philippine silver peso piece, to be coined at the Mints at Philadelphia, and at San Francisco. An early decision in this matter is requested.

I would add for your information that the Mint at Philadelphia is prepared to commence this coinage when a supply of silver is received.

Respectfully,

H C Taylor

Acting Secretary.

March 25,1903.

The Honorable
The Secretary of War.

Sir:

I have the honor to acknowledge the receipt of your letter of March 24th, referring to an Act entitled,"An Act to establish a standard of value and provide for a coinage in the Philippine Islands," approved March 2, 1902, and stating that you are in receipt of cabled information from the Civil Governor of the Philippine Islands to the effect that under date of March 2, 1903, the Philippine Commission passed an act, the first section of which provides for the coinage, with the approval of the Secretary of War, of two million (2,000,000) silver Philippine pesos per month until twenty-four million (24,000,000) have been coined at the mints of the United States.

In pursuance of your request this Department will undertake the purchase of the silver bullion, the coinage of the same and delivery of the coin to such agent at San Francisco as you may designate.

Payment for this bullion will be made as delivered at the Mints by the Superintendents thereof, from what is known as the "Bullion Fund." This fund to be reimbursed monthly by the War Department causing to be deposited in the Treasury of the United States by the Bureau of Insular Affairs on behalf of the Philippine government, the amount expended each month by the Superintendents of the Mints for silver bullion delivered.

Accounts will be rendered monthly by the Superintendents of the

16

Mints showing the quantity of silver received and the cost of the same and forwarded to the War Department. The purchase of the silver bullion will be made by the Director of the Mint subject to the approval of the Secretary of the Treasury.

Mrs. Volney O. Chase,
1811 Riggs Place,
Washington, D. C.

Dear Madam.-

I regret very much to inform you that the information received by me, on the 23rd instant, over the long distance telephone from the Mint at Philadelphia, in regard to a gold medal, presented by the Government to Major General Brown, was incorrect. From a letter and a telegram received from the Superintendent of the Mint at Philadelphia, it appears that there was received at the Mint on the fourth of August 1902, from William Duval Brown, Solicitor of Patents, Muncie, Indiana, a gold medal of General Jacob Brown, which was melted and the proceeds,- $158.13, returned to him by the Adams Express Company on August seventh. The Superintendent of the Mint reports that as far as can be remembered the medal was in a mutilated condition.

The Department regrets that this medal should have been melted at the Mint, without the fact of its receipt being first communicated. If this had been done, measures would have been taken for its preservation.

Respectfully,

Assistant Secretary.

March 30,1903 .

To the
President of the U. S. Express Company,
New York City.

Sir.-

The Mint of the United States at Philadelphia, Pa., is now engaged in coining the one silver peso piece, authorized by act of Congress, approved March 2,1903, to be coined for the Philippine Government. I will thank you to inform me the rate at which you would be willing to transport these coins from Philadelphia to San Francisco. I would state for your information, that the coins are not legal tender in this country, and have only a bullion value, the rates therefore, for transportation should be based upon the commercial value of silver bullion. The act authorizing these coins provides that they shall be exchangeable in the Philippines at the rate of two pesos for one gold dollar of the United States, virtually giving them the value of fifty cents in the Philippines.

I would add that there will probably be from eight to twelve millions of these coins to be transported.

An early reply is respectfully requested.

Respectfully,

Assistant Secretary.

R.B.P

April 9,1903.

To the Honorable
The Secretary of War.

Sir.-

I have the honor to acknowledge receipt of your letter of the 8th instant, stating that Mr. Brush of the American Smelting and Refining Company had called attention to the fact that the delay in the payment for deliveries of silver at San Francisco Mint, for the Philippine coinage, compelled his company to make an additional charge to cover the interest on their money for a period of about ten days, required for verification and receipt of check at New York, from San Francisco, resulting in an additional cost of about ten points for silver delivered at San Francisco, over that delivered at Philadelphia, and requesting that the Superintendent of the Mint at San Francisco be authorized to wire the sub-treasury at New York to make payment for their account.

In reply you are respectfully informed that to facilitate the purchase, as well as to reduce the cost of the silver bullion required for the Philippine coinage, instructions will be given the Superintendent of the Mint at San Francisco to report by wire the cost value of all deliveries of silver bullion by the American Smelting and Refining Company or other sellers. Upon receipt of this information the Assistant Treasurer of the United States at New York will be instructed by the Treasurer of the United States to pay the amount. To carry this arrangement into effect, however, it is necessary that the American Smelting and Refining Company should empower some one in San Francisco to receipt to the Superintendent of the Mint for checks given by him from time to time, and to endorse and deposit the same with the Assistant Treasurer of the United States at San Francisco.

The Treasurer of the United States and Director of the Mint will give instructions in detail to the Assistant Treasurer of the United States at San Francisco and New York, and the Superintendent of the Mint at San Francisco. The American Smelting and Refining Company will also be advised.

Respectfully,

Acting Secretary.

April 9,1903.

To the Honorable

The Secretary of War.

Sir.-

I have the honor to acknowledge receipt of your letter of the 7th instant, requesting that a corresponding arrangement may be made in regard to the manufacture of the subsidiary and minor coinage of the Philippine Islands as in the case of the one peso silver coin, and take pleasure in informing you that your wishes will be complied with, and coinage of subsidiary and minor commenced as early as practicable.

Respectfully,

Acting Secretary.

April 9,1903.

To the Honorable
The Secretary of War.

Sir.-

In compliance with your request of the 8th instant,I have the honor to inform you that the Director of the Mint will be instructed to cause twenty (20) sets of proof coins of the Philippine coinage to be made and forwarded to the Insular Bureau of your department, as early as practicable.

I would state for your information that full sets of these coins can not be struck until the five, one, and one-half centavo dies are completed, which will probably be in the course of the next two weeks.

Respectfully,

Acting Secretary.

April 13,1903.

To the Honorable

The Secretary of the War.

Sir.-

I have the honor to transmit for your inspection and approval specimen of the new fifty, twenty, and ten centavo silver coins of the Philippine Islands. If the specimens meet with your approval, the coinage of the same will be commenced as early as practicable.

For your information I would state that the dies for the five, one, and half centavo pieces will be completed about the first proximo, when specimen pieces will be struck and submitted for your approval.

Relative to the metal required for the minor coins of the Philippine Islands, it is proposed to procure the necessary blanks under a contract this Department has with the Scovill Manufacturing Company, Waterbury, Connecticut, for furnishing the blanks for our five cent nickel and one cent bronze pieces, all cleaned, annealed and milled ready for the imprint of the dies, the former @ $0.5388 per pound, and the latter @ $0.2812 per pound.

It is believed that this course will be advantageous and it will greatly facilitate the commencement of the minor coinage for the Philippine Government.

Respectfully,

Secretary.

April 15,1903

B. H. Tatem, Esq.,
Assayer in Charge U. S. Assay Office,
Helena, Montana.

Sir.-

Referring to our conversation on your recent visit to the Department, relative to the rate now paid for the transportation of gold bullion from the Assay Office at Helena, Montana to the Mint at Philadelphia, in which you stated that the banks were given a lower rate to New York and Philadelphia than that now paid by the Government on gold bullion, I would be pleased to have you, if possible, give confidentially to the Director of the Mint the rate paid by the banks in order that the subject may be taken up and considered by him as early as practicable, as in the absence of any information we have no basis uppn which to act.

Respectfully.

Assistant Secretary of the Treasury.

April 20,1903.

To the Honorable

The Secretary of State.

Sir.-

In compliance with your request of the 18th instant, I have the honor to transmit herewith copies of the reports of the Director of the Mint, for the past five years, for transmission to the Consul general at Mexico City.

Respectfully,

L. M. Shaw

Secretary.

April 21, 1903.

Hon. T. C. Platt,
President United States Express Company,
49 Broadway, New York City.

Sir.-

Referring to your letter of the 7th instant, wherein you quote "$13.75 per one thousand dollars bullion value on the gross weight of the coinage" as the rate your company would transport the silver coins for the Philippine Government from the Mint at Philadelphia to San Francisco, you are respectfully informed that the Bureau of Insular Affairs, War Department, have arranged for the transportation of the coin referred to from New York to Manila, via sea. Your offer is therefore respectfully declined.

I will be pleased to have you name a rate at which you will transport, at bullion value, three million silver pesos (packed in kegs) from the mint at Philadelphia to New York, delivering the same at Pier # 52, North River (shipping Berth).

Respectfully,

L. M. Shaw

Secretary.

April 24, 1903.

Hon. T. C. Platt,
President United States Express Company,
New York City.

Sir.-

Your letter of the 23rd instant in reply to that of the Department of the 21st instant, requesting you to name rate at which your company would transport, at bullion value three million silver pesos, from the Mint at Philadelphia to New York has been received.

You request to be informed "as this money belongs to the United States and as the transportation is between points within the territorial limits, of the contract between the United States and the United States Express Company", why same does not come within the terms of the contract, "and why it should not be transported in accordance therewith, in pursuance of precedents heretofore established?"

In reply you are respectfully informed that in no sense do these coins belong to the United States. The bullion from which they are coined, the cost of coinage, as well as the expense of transportation from the Mint at

Philadelphia to Manila, is defrayed by the Philippine Government. They are not legal tender for any sum whatever in the United States, and therefore can be valued only as bullion.

In requesting you to name rate at which your company will transport these coins from the Philadelphia Mint to New York, the Treasury Department is simply complying with the request of the Philippine Government as made through the Secretary of War, and the transportation of these coin can not therefore be regarded in any manner as coming within the limits of your contract with the Treasury Department.

In Department letter of the 21st instant, you were requested to make delivery at Pier # 52 North River, but I am now informed that the Steamer "Breizhuel" by which these coins are to be shipped to Manila will load at Independent Stores, South Brooklyn, and not in the North River, and they may be delivered at any time between the seventh and eleventh of May.

Respectfully,

H C Taylor

Acting Secretary.

April 30,1903.

To the Honorable

The Secretary of War.

Sir,-

I have the honor to transmit herewith for payment an account of the Superintendent of the Mint of the United States at San Francisco, amounting to $409,457.56 expended by him from March 26th to April 23, 1903, in the purchase of 818,645.53 ounces of fine silver for the Philippine coinage, authorized by act of March 2, 1903.

The receipts, in duplicate, of the parties to whom payments were made by the Superintendent of the Mint are filed with the account.

It is desirable that the Superintendent of the Mint be reimbursed, with out delay, for the amount expended, I have therefore, to request that you will cause the sum of $409,457.56 to be deposited with the Treasurer of the United States for account of the Superintendent of the Mint at San Francisco.

If payment is made by check, the same should be drawn in favor of the Treasurer of the United States, and transmitted under cover to the Director of the Mint.

The object for which the check is issued should be noted on the margin, viz. to reimburse the Mint at San Francisco for silver purchased for the Philippine coinage. As soon as the check has been collected by the Treasurer of the United States, his receipt will be transmitted to you for the amount.

Respectfully,

Hon. Redfield Proctor,
Proctor, Vermont.

Sir:

Your letter of May 23rd relative to the request of Samuel H. Graham, Weigh Clerk of the U. S. Assay Office at New York for an extension of his term of service is at hand. Mr. Graham, as you state, has been an employe of the above named office for nearly fifty years. During the major part of the last year he has been so feeble as to be unable to give personal attention to the duties of his responsible position. The necessity of filling the place with a more active man led to the suggestion in February last that he retire from the service. Mr. Graham assented but asked that his resignation be dated ahead to take affect on the first day of April. Later, at the request of Senator Dillingham, the date was postponed to June 1st. As the prospective vacancy is known and applicants are being pushed for the position, it is desirable that the matter be closed up without further delay. Mr. Graham has already exhausted the full amount of leave that it would be possible to grant and so would not be able to draw his salary even if he remained longer in the service. It does not appear, therefore, that any practical benefit can be derived by him from an extension of his time while the affairs of the office would be held in suspension and more or less embarrassment ensue. For these reasons it is deemed impracticable to grant the request.

Respectfully,

TREASURY DEPARTMENT,

OFFICE OF THE SECRETARY.

My dear Sir:

The subject to which you allude in your letter of the 6th, the amount of gold coin estimated to be in the country outside of the Treasury, is a matter which has interested the Department for several years. The present Director of the Mint, Mr. Roberts, has been conducting an inquiry for the purpose of detecting any errors that may have occurred in past calculations, and when he shall have completed these estimates they will doubtless be given to the public, and will be as reliable as possible. The present estimates are not founded, as you suggest, upon estimatedproduction, and do not take into account the movement or consumption of bullion, but deal entirely with gold coin. The output of the mints, less the amount of recoinage is added monthly as is also the imports of domestic coin, and from this aggregate is deducted the exported domestic coin and the estimated amount of coin consumed in the arts.

The subject is an interesting one, but it is manifestly impossible to determine with any degree of accuracy what the stock of gold outside of the Treasury and banks may be except by the method now pursued, which assumes it to be the difference between the stock in sight and the aggregate amount known to have been turned out by the mints, less the net losses by

exportation and industrial consumption.

Very respectfully,

L. M. Shaw

Sir.-

I have the honor to acknowledge the receipt of your letter of the 17th instant, and respectfully submit the following in reply.

First.- The figures of the circulation statement issued July 1,1902 are approximate while those in the report of the Director of the Mint, cited by you, are the revised figures compiled from the final returns of June 30,1902. In the table page 33, Report of the Director of the Mint 1902, columns headed " Held for payment of outstanding certificate $453,997,000 includes $446,557, 662 outstanding silver certificates and $7,439,338 certificate held in Treasury cash (see page 43 Report Director Mint 1902".

Second.- The difference of $7,346,757 between the amount of silver dollars held for the payment of outstanding certificates $453,997,000 July 1,1902 as stated in table page 33, report Director Mint 1902, and the amount

$ 446,650,243 as stated in the circulation statement July 1, 1903 is the amount of certificates held by the Treasury, see public debt statement July 1,1902.

The revised figures show the actual amount of silver certificates outstanding July 1,1902, to have been $446,557,662, silver certificates in Treasury $7,439,338 making a total of $453,997,000 as shown on page 44, Mint Report 1902.

Third.- On page 139 Finance Report and page 44, Mint report for 1902, the revised figures of subsidiary silver coin outstanding July 1,1902 is stated as follows.-

Subsidiary silver in the Treasury		$11,462,534

Sir:

I beg to enclose copy of letter recently received by the Bureau of American Republics from the firm of C. Lyon Hall & Co., Port au Prince, and to ask you to give us such further account of the monetary system and conditions in Haiti as will enable us to publish an accurate report thereupon.

We understand that the statute of September 24, 1880 is still the monetary law of the country. It appears from the letter enclosed that the provisions of this statute have never been carried into effect. We would like particularly to know what is the present monetary standard of the Island; what is the actual currency of the country?

Mr. Arthur D. Shelton,
Secretary, Committee on Finance,
U. S. Senate.

Sir:

Referring to so much of your letter of December 8th as makes inquiry concerning the need for a United States assay office at Portland, Oregon, I beg to say that Bills similar to S.280 have been introduced heretofore and the opinion of this Department has always been given adversely to their passage.

The gold fields of Oregon are located in the southern and eastern parts of the State, both localities being at a considerable distance from Portland. The producers in the southern counties can ship their output to the mint at San Francisco at scarcely greater expense than to Portland and if they sent it to the latter point, it would have to be reshipped back over the same line of railroad to San Francisco at the expense of the government. The producers in the eastern portions of the State can ship to the assay office at Boise at probably no greater expense than it would cost to ship to an office in Portland. The gold fields to the north of Portland are already served by the assay office at Seattle. The Department, therefore, is of the opinion that any additional accommodations that would be furnished to the public by an assay office at Portland would not be sufficient to warramt its establishment.

Respectfully,

L M Shaw

Pursuant to request of your Committee, the estimates for the several institutions of the mint service have been revised in order to specify the salaries for the entire clerical and administrative force, taking all positions of that character out of the estimate for wages of workmen. All of the places now added to the salary lists have been filled heretofore by per diem employes. In making the transfers from the per diem rolls there have been some slight changes in the compensation of both per diem and salaried clerks, but these changes have been readjustments for the purpose of correcting inconsistencies that have existed and to bring similar positions in different institutions to approximately the same pay. The total of appropriations for the mint service has not been increased thereby.

Excepting the New Orleans Mint, the sum total of appropriations for the service last year was $1,106,100; the sum total of the enclosed estimates for the same institutions is $1,107,120, but this includes several items of increase submitted in the original estimate, among them $2,500. for additional workmen in the New York Assay Office.

The revised estimate is submitted herewith.

Respectfully,

H A Taylor

United States Senate.

Sir.-

I have the honor to acknowledge receipt of your reference of Senate Bill 176 for the relief of Jewett W. Adams, late Superintendent of the Mint United States, Carson, Nev., for report of facts and recommendations. In reply I would respectfully state that the facts in this case are fully and correctly set forth in the papers forwarded with the bill, which I return herewith.

Respectfully,

Secretary.
